

(The Monroe Institute Bulletin, March 1986)

**QUARTERLY EXPLORER TAPE**  
*Creation, Time, and Other Things*

The Explorer tape excerpt for this quarter covers a range of subjects... beginning with creation. Explorer TVP communicates with a soul cluster that says it's time for earth scientists to begin seeing beyond a specialized field of study such as astronomy, psychology or anthropology, and realize the interrelation and unity of the entire universe. This "big picture" discussion encompasses the "Big Bang" theory, time, the collective unconscious and the Universal Mind (and the differences between the last two).
